**Attachments:** arprkwet1016.pdf

CLASSIFICATION: UNCLASSIFIED

The west side looks as we agreed. The area around the vernal pool shown as 10% is not correct. We agreed that flags would move to decrease the overall size, and there is an area around that vernal pool that is 100% wet. I would like to wait for Bryan tomorrow to finalize anything, and today I will talk to people in Norfolk about applying a percentage for permitting purposes. I will get back when I know more. Thanks.

Elaine,

Good to see you today.

Thanks much for pushing through the rain and getting this field visit complete today. We will forward the report and data point info and maps as direct pdf and not a 'download link'.

After the close of the field visit Sara and Travis from our shop gave me a rough mark up of the results. I've compiled this onto the colored map. Please see attached for my understanding of what the final map will generally show.

I have put this info onto a plain white plan sheet w/ topo lines for reference and will send that scan tomorrow morning.

Travis is working on the GPS update for the areas and final wetland/mosaic area limits.

Please confirm the mark up I have attached is the mapping understood from today that everyone generally agreed on.

Let's touch base tomorrow and discuss as necessary to close out the final updated JD so we can all move forward.

Thanks again,  
Malachi

Also, we cannot download files. Please email the delineation package in parts. Thanks.

Bryan,

Please see the two attached maps. Both are overall maps, one is with topo and one is without.

Let me know if you need any more information.

Thanks,

---

Subject: Airpark Overall Wetland Delineation Map

Sara,

Thank you for providing the Airpark wetland delineation information. I was able to access the link and download the information successfully. The detailed delineation maps are helpful, but can you also provide an overall delineation map that includes the entire project limits and delineated wetlands on one sheet? If possible, topography would also be nice on this sheet, but if it gets too difficult to read please leave off.

I will continue reviewing today and hope to have my review completed by the time of our meeting tomorrow. Please let me know if you have any questions.

Thank you,

Bryan Jones
